

Aries  
December 2011

This month, your career and finances are moving in a positive direction, dear Aries! You do have some potential partnership issues or competitor-related dramas that could pose a challenge, but you are able to take on a leadership role or convince authority figures to do things your way or to choose a solution that works well for everyone. Networking helps with your financial, professional, and partnership related activities.

With Mars still in your workaday sector until early July, work will be plentiful. If you are self-employed or looking for work, this is very good news! Even if neither applies, your services will be in demand while Mars sits in your 6th house.

With Venus sending a little kiss to Mars, as well as the moon sitting in Aries, December 3rd through the 5th looks to hold an opportunity for you to shine! You may enjoy a dazzling career success and Lady Luck should smile on you! Career is highly favored in this time frame. Concurrently, Pluto will be in your 10th house of fame and Jupiter in your 2nd house of money! If you have been looking for work, dear Aries, you may receive an offer in this time frame and that could be a dream comes true! It would likely be a high position with even higher pay! Wow! When it comes to work, it really seems you are blessed right now.

December 10th is the big event for December, with a full moon lunar eclipse at 18 degrees of Gemini. Eclipses can have an immediate and profound effect on us, but sometimes, they have a subtler effect over a period of 3 months or so. This eclipse sees the finalization of contracts, agreements and in some cases even the ending of dysfunctional relationships. News is possible from a sibling or relation within 5 days of this date. Remember eclipses tend to put before us issues over which we have little or no control. This particular eclipse is connected to the one we had on June 15th of this year. Think back to what was happening then, as you may see a correlation in events.

As this is a lunar eclipse, it is possible a woman may be exiting your life. It could be a coworker, a friend, even a family member. Whoever she is, she would be exiting your daily sphere; that is, not interacting with you in the same way as before.

If your birthday falls within the window of April 1st to April 14th, you will find a way to make this eclipse work to your benefit.

If your birthday falls between April 7th and April 19th, you may be feeling the weight of Saturn bearing down on you. Stress levels are running high and you are prone to illness. Be extra sure to take good care of yourself right now. Saturn is the task master who demands a strict adherence to the rules!

December 11th through the 16th favors travel. Actual physical travel may be difficult with the extra-intense workload, but arm chair travel is also covered by this aspect. This can include online classes, social media, ecommerce, internet sales and online activities.

From December 11th to February 6th Jupiter and Saturn are opposing each other in your chart, dear Aries. The opposition is between your 2nd house of personal wealth and self-worth and your 7th house of partnerships and rivals. A spouse, business partner, best friend, ex-spouse, or business rival is upset and likely jealous about your financial circumstances. They are talking about you and voicing their opinions of your spending habits.

December 13th, Mercury stands direct, so it is safe yet again to buy electronics and other big ticket items...just in time for Christmas, yay! It is also safe to "sign on the dotted line", so now is the time to sign contracts!

December 16th through 20th, Venus clashes with Saturn heightening the jealousy situation. Again, it looks like a partner, an "ex", a friend, boss or authority figure is voicing their opinions a bit too vociferously!

In this same time frame, Neptune and Jupiter jump in to help out and smooth the path for you. Possible outcomes of this would be an agreement being reached with a rival, a new child support agreement put in place with an ex-spouse, or a business competitor finding themselves firmly stomped!

Venus exercises a softening influence on Saturn from the 18th to the 22nd, providing you with an opportunity to talk things out with a close relationship. If things have been tense, now is the time to fix them.

December 20th through the 25th offers a chance to push talks forward and see the kinds of professional results you've been dreaming of. You can settle a deal or start getting some truly solid offers for your position or career. The new moon in Capricorn promises the boost you've been working towards!

While this month's focus is largely on your career, dear Aries, romance comes back into focus after December 20th when Venus moves into Aquarius where it is happily compatible. Through January 14th fortune smiles upon your romantic forays! New Year's Eve sees the new moon in Aries again, allowing even more dreams to come true. Aries, fortune is truly smiling on you at this time, so be sure to make the most of it!

Merry Christmas and Happy Holidays to you and yours dear Aries. I wish you abundance in the coming year.
