

I believe the old saying goes, “March comes in like a lion and goes out like a lamb”. This year, from an astrological viewpoint the reverse is true. March starts out softly enough, like a sweet little lamb with four of our faster moving planets in Pisces. The bigger, more painful events of February are slowly moving into the past, though we may still be dealing with those endings. Jupiter and Pluto met with an incendiary force last month, and for many of us, left holes in our lives. It is important we accept the spiritual lessons that so much planetary activity in Pisces brings us, without getting bogged down in self-pity or victim mentality, the ever-present threat of Pisces.

We may continue to deal with endings for now, until Uranus and Neptune finally settle into their new signs. We are blessed with one of these events on March 11th, when Uranus moves to zero degrees of Aries and is home to stay for the next seven years! It will be a seven journey into self-awareness, independence and discovery of our life purpose. Uranus in Aries will give us courage, allowing us to be ourselves and worry less about the opinions of others. We will step out from under the yolk of oppression, and roar our independence! Everything from bad relationships to bad governments will topple under this influence!

It will be early April before Neptune finally settles in Pisces for it’s extended stay, and we will talk about that in great detail next month. For now, let’s just say, new and exciting changes are coming!

As those four fast-moving planets storm through Pisces this month, prepare yourselves for upheaval as they square the Lunar Nodes. Situations, energies, emotions and people that seemed to just disappear toward the end of December 2010, may resurface as these triggers occur on March 8-9 (Mercury) March 18-19 (the Sun) and March 28-29 (Mars). This Lunar Translation combined with the intensity packed Lunar Eclipse points will assure that doors will be flung wide open for us to proceed toward our new beginnings.

Jupiter and Pluto square again on March 13 and 15. The “storyline” we’ve seen playing out as recently as February will come up again. We must deal with that pain or loss properly in order to move forward well and whole.

The Sun’s conjunction to Uranus in Aries happens on the Vernal Equinox, packing some extra oomph into the spring season! We will see movement and change both around us and in our own lives. Do not fear these changes, embrace them! Even if we do not understand them at first, they further our path and bring us growth, helping us become who and what we are ultimately meant to be.

On March 28, the Sun squares Pluto, giving us a two week window in which to adjust our direction as new factors come to light. Jupiter and Saturn oppose one another a final time on this day, bringing the low point in our current economic and real-property 20 year cycle. There are larger cycles at play right now that will help sustain the low and require systematic innovation to stabilize the exchange of goods and properties. This signals a time when society’s desire for change moves faster than the system’s ability to accommodate it. The end result will likely be people taking charge and leaving large entities in the dust. Watch the Middle East, Egypt and Libya to see this aspect in effect.

Aries:

You are finding partnerships to be high maintenance right now and you are not sure as to how to move into the future in your current relationship. It sometimes seems like you are your own worst enemy! You have had some very big moments the past month, however you can overstretch yourself and make promises you may not be able to keep. You might want to reflect on your intentions and your immediate

goals. This is a big month for you to reflect and see if you are keeping current with your own goals. You have listened to friends and family so much that it is becoming hard for you to know what you want, as opposed to what they want for you. Make some time to examine the areas of your life crying for change so that you can best utilize your strengths instead of focusing on your weaknesses. You can accumulate wealth while Pluto is in Capricorn, however you can also accrue heavy debt. Which will you choose?
